

Seminar Topic: Medical Cannabis Investment

Since June 2022, I've been writing about medical cannabis, with intermittent stays in Berlin and Isaan, Thailand. Notably, Thailand's medical cannabis landscape is more advanced compared to Germany.

My forthcoming book features an extensive introduction, seven typical case discussions where I visually emphasize key treatment instructions for cannabis use based on my understanding. Furthermore, the book comprises six theme-centered chapters: Cannabis and Sexuality, Addiction, Cancer, Expansion of Consciousness, Ayahuasca, and Vision Quest.

As a physician with a surgical background and a psychoanalyst, my journey into this field began when I was 62 years old, following a domestic accident that led to a three-month hospital stay and subsequent classification as a care case. In 2015, I became a member of a patient group that regularly convened at DHV* in Berlin - Prenzlauer Berg, where I acquired the skills to effectively manage my pain issue, stemming from a shoulder fracture, without resorting to opioids. Shortly thereafter, I joined Berlin's first CSC**, volunteering as the sole doctor for nearly two years.
